

# COSMOL GEL series

Glycerine and Glyceryl Acrylate/  
Acrylic Acid Copolymer and Silicones

COSMOL GEL series

## DESCRIPTION

It's unique structure of methacrylate, as a superior moisturizer with the function of preventing water release. It's improving the feeling of soft and glossy in the skins. It also keeps your skin moisturized well. It is colorless and transparent. It shows excellent stable structure and easy to be dissolved in water without a certain emulsifying system to dissolve. The most advantage of this product is that it's widely used for humectant and thickener in the personal care markets.
